The European Union, investing in your future

Fonds européen de développement régional
L'Union européenne investit dans votre avenir

Launched in October 2012 with 9 British and French partners in the frame of the Interreg IV A France (Channel) – England programme, **the A-I Chem Channel project has promoted the creation of an international scientific environment in molecular chemistry in the trans-channel region.**

This cooperation has led to knowledge development and transfer between laboratories and has enabled the partners to forge scientific collaborations with local and regional industries.

The A-I Chem Channel closing event will take place on January 20th, 2015 from 9 am to 12.30 pm at the hotel Mercure Champ de Mars in Rouen (France).

It will provide the opportunity to present the achievements of the project and actions led in cooperation with industry and innovation agencies, as well as feedback from some of those involved with the project. The meeting will be followed by a buffet lunch.
